

Team Member Quality Assurance (m/f/d)

Raikhlin Aircraft Engine Developments GmbH is a center for the design, research, development, and production of high-performance engines and their components. The company specializes in meeting the most demanding requirements of the aviation, defense, and automotive industries. Development is conducted in accordance with CS-E and CS-23 as part of an EASA Part 21 design organization.

We are seeking a Team Member Quality Assurance (m/f/d) to join us as soon as possible.

01

Responsibility

- Ensuring that all received components and equipment meet the specifications and that the required documentation is correct and complete.
- Planning and scheduling of quality inspections and complex component measurements, with or without specifications.
- Evaluating and documenting measurement results and communicating them to the development and production departments.
- Ensuring the creation and maintenance of the ERP system database (e.g., creating test plans, obtaining supporting documentation, etc.).
- Ensuring the archiving of test results, protocols, and reports.
- Handling requests to the DO in the event of deviations.
- Providing technical leadership for the QA team.
- Acting as the information interface between QA/DO, RED, and PO on QA-related topics.
- Deputy Testing and Measurement Equipment Officer.
- Openness to participate and conduct internal audits would be a plus.

02

Qualification:

- Completed training in a technical field (Techniker, Meister or similar)
- Proficiency in software (MS Office, ERP system (NUCLOS), MS Teams).
- Certified measurement technician.
- Ability to read technical drawings.
- Knowledge of applicable procedures in initial Airworthiness tasks of quality control.
- Proficient in English; knowledge of German is an advantage

03

Offer:

- A role in a company that offers the perfect blend of international flair, down-to-earth values, professionalism, and innovation.
- A corporate culture characterized by mutual trust and recognition of achievements.
- Teamwork and open communication.
- A varied range of duties.
- Competitive remuneration.

Please understand that we can only consider complete and substantive applications (submitted by email) that include a cover letter, resume, transcripts, certificates, and any additional qualifications, along with your earliest possible start date and salary expectations.
